                                                                                                                                                                                   The invention relates to an isolated nucleic acid detection reagent capable of detecting 1000 or more genes from Drosophila. The invention useful in developmental biology and in elucidating cell signalling and cell-cell interactions in higher eukaryotes for the development of insecticides, therapeutics and pharmaceutical drugs. The invention discloses genomic DNA sequences (ABL01840-ABL16175) and the encoded proteins (ABL01840-ABL16175) and the encoded proteins (ABB57737-ABB72072).
                                                                                                                                                                                                                                                                                                                                                                                                                New isolated nucleic a genes from Drosophila interactions -
                                                                                                                                      The sequence data for this patent did not form part of the printed specification, but was obtained in electronic format directly from
                                                                                  Sequence 1863 BP; 425 A; 493 C;

GENERAL INFORMATION:
APPLICANT: Commonwealth Scientific and Industrial Rsrch. Org.
TITLE OF INVENTION: MALATHION CARBOXYLESTERASE
FILE REFERENCE: Attorney Docket No. 6235515 50179-051
CURRENT APPLICATION NUMBER: US/09/068,960A
CURRENT FILING DATE: 1998-05-20
EARLIER APPLICATION NUMBER: PCT/AU96/00746
EARLIER APPLICATION NUMBER: PCT/AU96/00746
EARLIER APPLICATION NUMBER: AU 6751
EARLIER FILING DATE: 1996-11-23
EARLIER FILING DATE: 1995-11-23
NUMBER OF SEQ ID NOS: 43

Sequence 9, Application US/09068960A

Patent No. 6235515
GENERAL INFORMATION:
APPLICANT: Commonwealth Scientific and Industrial Rsrch. Org
TITLE OF INVENTION: MALATHION CARBOXYLESTERASE
FILE REFERENCE: Attorney Docket No. 6235515 50179-051
CURRENT APPLICATION NUMBER: US/09/068,960A
CURRENT FILING DATE: 1998-05-20
EARLIER APPLICATION NUMBER: PCT/AU96/00746
EARLIER FILING DATE: 1996-11-23
NUMBER OF SEQ ID NOS: 43
NUMBER OF SEQ ID NOS: 43
                                                                                                                                                                                                                                                                                                                              ; NUMBER OF SEQ ID NOS
